

Sound Check (GA908) Personal Noise Indicator

Excessive noise in the workplace is common in many professions and is a potential risk for a large number of employees. It can lead to hearing loss which is a permanent work-related injury.

It is not only in the workplace that noise can be a problem, music events, discos or other leisure activities where excessive noise is involved can be one of the greatest causes of hearing damage- especially for young people who are not aware of the dangers!.

The Sound Check allows you to assess at a glance, situations that may effect your hearing in and out of the work place.

It contains a microphone sensor that registers noise levels in the wearer's surroundings. A microchip translates this into light - in coloured LEDs as follows:

GREEN = < 80 dB(A) **YELLOW** = 80-100 dB(A) **RED** = > 100 dB(A)

Branding

Sound check can be branded with your company design or details making them perfect for a company visitor badge or promotional give away.
